Programs in the pipeline	Clinical-stage programs	Orphan Drug Designations	People across R&D and clinical

Pipeline

BN-101 *NanoDox*	HER2-low metastatic breast cancer	Thalorix-encapsulated topoisomerase inhibitor	Phase 2
BN-204 *HepaSiRx*	Vasquez–Trent Syndrome (a fictional rare hepatic metabolic disorder)	Hepatocyte-targeted siRNA nanoparticle	Phase 1
BN-310	Locally advanced pancreatic adenocarcinoma	Stroma-penetrating nanoparticle chemotherapy	IND-Enabling
BN-450 *ImmunoCarrier-RSV*	Respiratory syncytial virus, adults 60+	mRNA nanoparticle vaccine	Phase 1/2
BN-500	Calder–Reyes Disease (a fictional rare lysosomal storage disorder)	Enzyme-replacement nanoparticle	Preclinical
BN-600	Platform research — solid tumor targeting	Ligand-targeted next-generation nanoparticle	Discovery

Funding history

Seed	2019	$6M	Meridian Life Sciences Partners
Series A	2021	$32M	Meridian Life Sciences Partners
Series B	2022	$58M	Northbridge Venture Partners
Series C	2024	$85M	Northbridge Venture Partners

Korvexis Therapeutics is a fictional company created for a design and content portfolio. Nothing here describes a real company, product, trial or regulatory action.
